

MICRO DAILY EMF

EMF Radiation Defense

PROMOTES YOUR NATURAL CELLULAR DEFENSES TO COMBAT EMF RADIATION

Micro Daily EMF provides the ultimate nutritional defense against the threat of 5G EMF radiation and other non-ionizing radiation often referred to as EMF (electro magnetic field) radiation. EMF radiation comes from cell phones, microwaves, powerlines and even MRIs.

As the world's first Radiation Biologist, Dr Kedar Prasad, PhD worked with the U.S. Military, NASA, and others to understand the power of micronutrients in fighting the dangers posed by exposure to radiation. Dr. Prasad is uniquely qualified to formulate Micro Daily EMF to provide you the best nutritional defense possible against EMF radiation.

- World recognized expert on radiation and nutrition
- Awarded U.S. Patent for his research on radiation and micronutrients
- Conducted research with NASA on radiation and micronutrients
- Developed Micronutrient formula with U.S. Military to protect U.S. Troops from the inside out from toxic environments

Dr. Prasad's Supporting U.S. Patent: 7,449,451 Date Nov. 11, 2008
Antioxidant micronutrients as systematic biological radio protective agents against potential ionizing low-dose radiation risk.

SPECIAL INGREDIENTS THAT GIVE MICRO DAILY AN EXTRA BOOST DEFENDING YOUR BODY

Dr. Prasad's research has shown that these special ingredients work in harmony with the other micronutrients in Micro Daily EMF to enhance it's effectiveness in EMF radiation defense.

Methylated forms of Folic Acid and Vitamin B-12 for maximum absorption.

Quercetin: NRF1 activator that promotes mitochondria biogenesis and helps support mitochondrial function. In studies it has been shown to increase the survival of animals when administered before whole-body lethal doses of radiation.

Resveratrol: activates the Nrf2 pathway and protects nerve cells by reducing oxidative damage and pro-inflammatory toxic chemicals. In studies, when administered before whole-body lethal doses of radiation, it has been shown to increase the survival and decrease the damage to the liver and intestine which are very radioactive sensitive organs.

Curcumin: activates the Nrf2 pathway and works with Resveratrol to protect nerve cells by reducing oxidative damage and pro-inflammatory toxic chemicals. When administered before irradiation it has been show to increase the rate of healing in radiation induced damaged skin, and decrease radiation-induced lung fibrosis in animals.

Green tea extract: is loaded with anti-oxidants and has well known health benefits. In addition, when administered before irradiation it has been shown to increase the survival of irradiated animals by decreasing oxidative damage.

KEY BENEFITS OF MICRO DAILY EMF

- ✓ Maximum Absorption
- ✓ Anti-Inflammation Response
- ✓ Immunity Boost
- ✓ Increased Energy
- ✓ DNA Integrity and Health
- ✓ Anti-Aging
- ✓ Cardiovascular Function
- ✓ Whole Body Health at the Cellular Level
- ✓ Natural Cellular Defenses against Toxic Environments

* PATENT PENDING
